

Planned Temporary Water Suspension Notices

06/01/2016 until further notice

Please be informed that water supply to the areas/buildings around town will be temporarily suspended during the next two months.

These temporary interruptions are a continuation of water lateral replacement, (phase 2) of the project started last year.

Please also note that supply may be restored earlier or later than scheduled without further notice.

The Town will make every effort to advise residents and business owners on the streets affected by water interruptions.

We apologise for any inconvenience this will cause and greatly appreciate your patience.
